Montessori English Dialogues is a collection of 20 reading activities, designed to help primary school children improve their reading comprehension skills in English. The materials encourage independent learning and provide the opportunity for children to learn and build knowledge at their own pace and in their own time. As children become aware of their own learning they will gradually become more independent and self-confident.

There is downloadable audio for each error control card, so that children can check their own work and correct themselves. In this way errors become an indispensable and necessary step for active and constructive learning.

There are several different activities so that children can choose what they want to work on by themselves on the basis of their own interests and skills.

Envelopes can be made for each individual activity, so that materials can be classified and put away tidily. This makes it easy for children to find and use them whenever they want to improve their English language skills.

Oresentation of the materials

Description of the material for each activity:

8 numbered cards with 8 questions, 8 unnumbered cards with answers and vice versa, 2 picture cards and an envelope to cut out and make.

Presentation of the material for each activity:

Cut out all the question and answer cards and the picture cards.

Place the numbered cards one below the other on the table (with the question cards on the left and the answer cards on the right). Point out the different coloured outlines on the picture cards which correspond to the colours on the numbered and unnumbered sentence cards. Put the appropriate picture card under each column according to the colour of the outline.

Demonstrate how to do the activity by matching the unnumbered cards with the appropriate numbered cards already on the table, to form a dialogue with questions and answers.

Indicate the materials necessary to make the envelope for storing the cards at the end of the activity.

is a collection of reading materials designed to help primary school children improve their reading comprehension skills in English. The materials encourage independent learning and provide the opportunity for children to learn and build knowledge at their own pace and in their own time. As children become aware of their own learning they will gradually become more independent and self-confident. The activities consist of dialogues, designed to consolidate reading skills but also incentivise and encourage interactive oral production.

Children are free to choose the activities they want to do based on their own interests, skills and level of curiosity.

The materials were developed after carefully observing the way children work and are divided into sections:

- · Materials to cut out and present.
- Envelopes for classifying materials and easy storage.
- Control of error cards and downloadable audio for self-correction.
